MURDER IN THE DARK

-GAME RULES-

DETECTIVE: Whoever has this card must figure out who the murderer is before the game is over. *The detective can walk around like everyone else, or stand still, but they can't be killed.*

MURDERER: Whoever has this card is the murderer and they must try to kill as many people before being caught. *Hint: Add two or more murderers for bigger groups.*

SUSPECT: Whoever has this card only walks around in the dark either trying to not be killed or trying to find "bodies" sitting around.

TO PLAY

Everyone draws a card to find out their role. Only the detective can share who they are. Once everyone knows their roles, you turn off the lights. *The darker the room the better and, for added difficulty, turn on some music.* Everyone starts to walk around. The murderer must touch someone on the shoulder to kill them. If you are touched, quietly sit down and stay still. If you feel a person sitting down, yell out "Murder in the Dark!". Everyone stops where they are. The detective then turns on the lights and has one chance to figure out who the killer is. If they are wrong, the person they mistakenly chose as the murderer must sit aside with the previously killed during the next round when the lights go back off. **Good luck.**
